

INTRODUCING THE NEW "HYDRAHEAT" FLAMELESS PORTABLE ELECTRIC HEATING SYSTEM FROM WATER NOW INC!

Built on Water Now's patented flameless heating technology, the HydraHeat is perfect for any environment that requires portable, fast heat. The HydraHeat uses no open combustion and does not have any high temperature surfaces that can cause explosions in high risk environments. More cost effective than other electric heating technologies and is proven to be safer than combustion heaters. The HydraHeat is available for summer delivery from Water Now Inc.

- ✓ Patented "Flameless" heating technology
- ✓ More efficient than conventional electric heaters
- ✓ No risk of explosion in high risk environments like paint shops, grain mills, auto body shops, etc.
- ✓ Portable design in rugged protective molded housing
- ✓ Safe for Pest Control (bed bug) applications

ABOUT WATER NOW, INC.

Water Now Inc., headquartered in Fort Worth, Texas, has developed a water purification technology that is cost-effectively producing portable water from fresh or salt water sources. Our flameless-heating process distills water without the need for filters, membranes or chemicals, eliminating maintenance costs as well as downtime caused by clogged membranes and filters. Our mission is to create solutions that make clean, affordable water available anywhere on the planet and to help end the spread of disease through contaminated water sources.

HydraHEAT

Flameless Heat Technology

Did You Know?

HOME SAFETY FACTS

House Fires

- Space Heaters account for 1/3 of all home fires, est. 25K.

- 300 deaths a year caused by unattended home heating.
- 48 % of all home heating fires occur in Dec, Jan, and Feb.

Bed Bugs

- A lethal temp. for Bed Bugs is 117 degrees °F.

- Heat treatments are widely accepted as the most effective elimination method.
- Bed Bug populations are becoming resistant to common insecticides, making high heat a necessary part of eradication.

- ✓ **READY TO USE** - unlike many units in the market HydraHEAT requires no extra components to purchase.
- ✓ Four wheels and a sturdy handle make maneuvering a breeze.
- ✓ Thermostat allows for complete temperature control; maximum output is 160 °F.
- ✓ HydraHEAT technology uses external electricity and internal propylene glycol to produce its heat
 - The FDA has classified food grade propylene glycol as an additive that is “generally recognized as safe” for use in food.
- ✓ The unit requires 20-amps and a 240-voltage outlet, (commonly found in most homes) which makes for a more efficient unit.
 - Competing heaters will often need an external power source or electrical adaptation for home use.
- ✓ **REDUCED FIRE RISK** – HydraHEAT has NO fuels, NO heat coils, and NO flame which removes the risk of fire due to unit tip over.

HydraHEAT Easy-Use Features

Easy to refill

Adjustable Temperature

Hide away cord in built in pouch
